

EMILIANO BORZELLI

SENIOR FULL-STACK ENGINEER

vibraains.com | emilianoborzelli@gmail.com | 305-632-6847 | github.com/vibraains | Atlanta, GA

SUMMARY

Hands-on engineering and software leader with extensive experience building and delivering full-stack web platforms for digital agencies, pharma, healthcare, and corporate clients. Expertise in NDOS, an internal platform, delivering TypeScript/React/Next.js/Node/PostgreSQL systems, APIs, CI/CD, and Cloudflare infrastructure, including producing AI systems with MCP servers, multi-agent orchestration, OAuth-secured retrieval, and Anthropic-powered workflows while keeping AI grounded in practical product execution.

EXPERIENCE

Director of Technology | *Near&Dear (formerly Moontide Agency)* | **Atlanta, GA** 2019 – 2026

Hands-on technical leader for a digital agency, owning architecture and implementation across client accounts while building the agency's internal operating platform.

Selected client work:

[OrangeTwist](#), [Hydrafacial](#), [JetZero](#), [CooperSurgical](#), [FIDO Alliance](#): Delivered headless CMS/Next.js sites and integrations: GitHub Actions CI/CD and custom content blocks for OrangeTwist, HubSpot for JetZero, Algolia search for CooperSurgical, and the FIDO Alliance site plus [Passkey Central](#) documentation hub.

[Sente Labs](#): Custom Shopify e-commerce site and a marketing performance analytics platform aggregating Klaviyo, Pardot, web, and social data with KPI dashboards and Anthropic-generated executive summaries; added role-based access, extensible CSV parsing, and PDF export.

[Sprout Pharmaceuticals](#) / [Addyi](#): Led technical strategy to consolidate a portfolio of websites into addyi.com plus an unbranded HSDD content hub; redesigned Find a Provider using PostGIS geospatial search.

[Near&Dear Agency](#): Built the agency website on Next.js and Payload CMS.

[Jeisys](#): Delivered custom HubSpot marketing website.

Selected agency work:

NDOS: Architected and built an internal operating platform for the agency, standardizing financial intelligence, workforce operations, institutional knowledge, AI-assisted workflows, and third-party integrations in a pnpm/Turborepo monorepo with shared TypeScript/Tailwind tooling and independent deployments.

[BurnKit](#) + [TimeKit](#): Built agency-wide operations systems: BurnKit analyzed every project across all client accounts, including billable and non-billable work to optimize operations and profitability; TimeKit processed time for all employees, synchronized approved Teamwork logs into PostgreSQL, and generated fixed-width Advantage payroll exports with hourly GitHub Actions sync. Next.js, React, PostgreSQL/Prisma, Cloudflare R2.

AI, MCP + internal tooling: Built internally used AgentKit with multi-agent delegation, autonomous background execution, Kanban/Eisenhower workflows, goal tracking, CI/CD, and a comprehensive automated test suite; built OAuth-secured [MemoryKit](#) retrieval and production FathomMCP/TwitterMCP servers; also shipped CalKit PTO-to-calendar automation and internal scaffolding CLI.

Front-End Developer | *Local Marketing Inc.* | Atlanta, GA

2016 – 2019

Led front-end architecture, design, and development for a high-performance automotive e-commerce platform, creating interfaces for real-time inventory, rich media, pricing and trade-in valuations, lender API financing, and online financial approval without a dealership visit. Also designed and built client websites and digital experiences, translating business requirements into polished, user focused front ends.

Built a high-performance automotive conversion-focused experience that enabled users to:

- Browse a real-time, dynamic vehicle inventory
- Explore rich media including 360° views, video, and detailed specifications
- Receive instant pricing and trade-in valuations
- Approve financing through integrated lender APIs

Sente Dashboard – vibrains.com/sente

TimeKit – vibrains.com/timekit/dashboard

Near&Dear Agency – nearanddear.agency

MemoryKit – vibrains.com/memorykit

Financial Cabinet – financial-cabinet.vercel.app

TECHNICAL SKILLS

Languages: TypeScript (strict), JavaScript (ES6+), Python 3, PHP, Ruby, HTML5, CSS3/Sass, SQL

Front End: React 19, Next.js 15/16 (App Router), Astro, Tailwind CSS v4, shadcn/ui, Radix UI, Recharts, Chart.js, TanStack Query/Table, GSAP, Zod

Backend & APIs: Node.js 22, Express, Hono, Cloudflare Workers, Durable Objects, REST APIs, MCP SDK, OAuth 2.0/2.1, Teamwork API, Fathom API, TriNet API, Twitter API v2, Google Calendar API, HubSpot

Data & Storage: PostgreSQL, SQLite (better-sqlite3, FTS), Prisma ORM, Supabase/Pgvector, PostGIS, Redis, Cloudflare KV, Cloudflare R2

CMS & Content: Headless CMS, Custom blocks, ACF, TinaCMS, Payload CMS, Statamic, Obsidian vaults

DevOps & CI/CD: GitHub Actions, Vercel, Sevala, Kinsta, Cloudflare Workers/KV/R2/Durable Objects, Docker, pnpm, Turborepo, CMS build tooling

AI & Agent Tooling: MCP server development (TypeScript SDK), Anthropic API, Letta Cloud Pro, Claude Code, Vercel AI SDK, multi-agent delegation, autonomous daemons, prompt engineering

Authorization & Identity: Auth.js/NextAuth.js, better-auth, Google OAuth, Slack/Box/Microsoft 365/Kandji OAuth integrations

Testing & DX: Vitest, Playwright, node-cron, Bruno API testing, ESLint flat config, Prettier, Chokidar

Platforms & SaaS: Shopify (Liquid, analytics), Google Workspace, Slack, Box, Microsoft 365, Teamwork, Kandji, Fathom, TriNet, Klaviyo, Pardot

EDUCATION & LANGUAGES

Education: Bachelor of Arts – BA, Information Technology

Languages: English, Italian, Spanish
