

EMILIANO BORZELLI

SENIOR / STAFF FULL-STACK ENGINEER

vibraains.com | emilianoborzelli@gmail.com | 305-632-6847 | github.com/vibraains | Atlanta, GA

SUMMARY

Hands-on engineering and architecture leader with extensive experience building and shipping full-stack web platforms for digital agencies, pharma, healthcare, and corporate client accounts. Built and operated NDOS, an internal platform, delivering TypeScript/React/Next.js/Node/PostgreSQL systems, APIs, CI/CD, and Cloudflare infrastructure. Built production AI systems with MCP servers, multi-agent orchestration, OAuth-secured retrieval, and Anthropic-powered workflows while keeping AI grounded in practical product delivery.

EXPERIENCE

Near&Dear (formerly Moontide Agency) | Atlanta, GA
Director of Technology

2019 - 2026

Hands-on technical leader for a digital agency, owning architecture and implementation across client accounts while building the agency's internal operating platform.

Selected agency work:

NDOS: Architected and built an internal operating platform for the agency, standardizing financial intelligence, workforce operations, institutional knowledge, AI-assisted workflows, and third-party integrations in a pnpm/Turborepo monorepo with shared TypeScript/Tailwind tooling and independent deployments.

BurnKit + TimeKit: Built agency-wide operations systems: BurnKit analyzed every project across all client accounts, including billable and non-billable work, for burn rate, profitability, utilization, and hours; TimeKit processed time for all employees, synchronized approved Teamwork logs into PostgreSQL, and generated fixed-width Advantage payroll exports with hourly GitHub Actions sync. Next.js, React, PostgreSQL/Prisma, Cloudflare R2.

AI, MCP + internal tooling: Built internally used AgentKit with multi-agent delegation, autonomous background execution, Kanban/Eisenhower workflows, goal tracking, CI/CD, and a comprehensive automated test suite; built OAuth-secured MemoryKit retrieval and production FathomMCP/TwitterMCP servers; also shipped CalKit PTO-to-calendar automation and a create-* scaffolding CLI.

Selected client work:

OrangeTwist, Hydrafacial, JetZero, CooperSurgical, FIDO Alliance: Delivered headless CMS/Next.js sites and integrations: GitHub Actions CI/CD and custom content blocks for OrangeTwist, HubSpot for JetZero, Algolia search for CooperSurgical, and the FIDO Alliance site plus Passkey Central documentation hub.

[Sente Labs](#): Custom Shopify e-commerce site and a marketing performance analytics platform aggregating Klaviyo, Pardot, web, and social data with KPI dashboards and Anthropic-generated executive summaries; added role-based access, extensible CSV parsing, and PDF export.

[Sprout Pharmaceuticals / Addyi](#): Led technical strategy to consolidate a portfolio of websites into addyi.com plus an unbranded HSDD content hub; redesigned Find a Provider using PostGIS geospatial search.

[Near&Dear Agency](#): Built the agency website with Next.js.

[Jeisys](#): Delivered custom HubSpot development.

Local Marketing Inc. | Atlanta, GA
Front-end Developer

2016 – 2019

Automotive sales platform: Led design and development of an end-to-end automotive sales platform enabling real-time inventory browsing, rich media, pricing and trade-in valuations, integrated lender-API financing, online checkout, and delivery or pickup scheduling without a dealership visit.

Built a high-performance, conversion-focused experience that enabled users to:

- Browse a real-time, dynamic vehicle inventory
- Explore rich media including 360° views, video, and detailed specifications
- Receive instant pricing and trade-in valuations
- Secure financing through integrated lender APIs
- Complete the entire purchase flow online and schedule delivery or pickup

SELECTED PUBLIC WORK

BurnKit – vibrains.com/burnkit

TimeKit – vibrains.com/timekit/dashboard

MemoryKit – vibrains.com/memorykit

Sente Dashboard – vibrains.com/sente

Near&Dear Agency – nearanddear.agency

Financial Cabinet – financial-cabinet.vercel.app

TECHNICAL SKILLS

Languages: TypeScript (strict), JavaScript (ES6+), Python 3, PHP, Ruby, HTML5, CSS3/Sass, SQL

Front end: React 19, Next.js 15/16 (App Router), Astro, Tailwind CSS v4, shadcn/ui, Radix UI, Recharts, Chart.js, TanStack Query/Table, GSAP, Zod

Backend & APIs: Node.js 22, Express, Hono, Cloudflare Workers, Durable Objects, REST APIs, MCP SDK, OAuth 2.0/2.1, Teamwork API, Fathom API, TriNet API, Twitter API v2, Google Calendar API, HubSpot

Data & storage: PostgreSQL, SQLite (better-sqlite3, FTS), Prisma ORM, Supabase/Pgvector, PostGIS, Redis, Cloudflare KV, Cloudflare R2

CMS & content: Headless CMS, custom content blocks, ACF, TinaCMS, Payload CMS, Statamic, Obsidian vaults

DevOps & CI/CD: GitHub Actions, Vercel, Sevalia, Kinsta, Cloudflare Workers/KV/R2/Durable Objects, Docker, pnpm, Turborepo, CMS build tooling

AI & agent tooling: MCP server development (TypeScript SDK), Anthropic API, Letta Cloud Pro, Claude Code, Vercel AI SDK, multi-agent delegation, autonomous daemons, prompt engineering

Auth & identity: Auth.js/NextAuth.js, better-auth, Google OAuth, Slack/Box/Microsoft 365/Kandji OAuth integrations

Testing & DX: Vitest, Playwright, node-cron, Bruno API testing, ESLint flat config, Prettier, Chokidar

Platforms & SaaS: Shopify (Liquid, analytics), Google Workspace, Slack, Box, Microsoft 365, Teamwork, Kandji, Fathom, TriNet, Klaviyo, Pardot

EDUCATION & LANGUAGES

Education: Bachelor of Arts - BA, Web Design Technology & Information

Languages: English, Italian, Spanish
